YOU

SANREMO
COFFEEMACHINES

You is a **single-group multi-boiler** machine designed for the prosumer market, created to offer **full control** over extraction parameters and maximum **freedom of expression.**

A **PID-controlled volumetric pump** ensures excellent stability during pressure profiling, even in the presence of incoming pressure variations.The body is made from **AISI 316 stainless steel**, with **electronic management** via a pressure transducer.

Whether in a busy café, a boutique coffee shop, or a private setting where quality and reliability are essential, *You* seamlessly combines **style and performance** in one refined solution.

YOU

You is designed to explore and fully express the **art of espresso**, thanks to a wide range of customisable settings engineered for **intuitive** yet **professional use.**

1 2 3

An **intuitive touchscreen display** features an app-inspired interface for seamless navigation.

Extraction profiles can be saved and recalled, with 6 presets and 12 customisable options across the three extraction phases, with the option to disable pre-infusion and post-infusion.

The ***Espresso Bloom*** function introduces a fourth phase for even greater control.

The **paddle** allows for precise, real-time manual adjustment of extraction profiles.

Direct control, absolute repeatability.

The paddle allows users to create, save and replicate pressure profiles, including the blooming phase.

It's electronically configurable and can be set for **right or left-handed use**, adapting to the barista's workflow. Pressure is adjustable from 6 to 12 bar.

Real-time monitoring of extraction parameters provides on-screen visualisation of both pressure and flow rate.

A new dimension in espresso extraction.

Precisely timed, *Espresso Bloom* optimises solubility, enhances delicate acidity, and unlocks the coffee's full aromatic profile.

CUSTOMISABLE PARAMETERS

- Pressure from 0 bar *(pure blooming)* up to 9 bar as an additional fourth stage
- Duration
- *Slow / medium / fast* ramp profiles to control extraction intensity

Also available in paddle mode, with an integrated timer for recipe control and storage.

Precision and operational comfort. The cold-touch steam wand enables instant activation of water and steam via fast, ergonomic start/stop levers.

Instant water heating ensures consistently high-quality infusions.

A programmable hot water economiser improves efficiency.

Temperature intensity and duration are fully adjustable.

A 2.5 L **removable water tank** features an integrated level sensor and can also be connected directly to the mains water supply.

YOU

You are in control

Intelligent energy management.
Thermal insulation and programmable operating schedules optimise energy consumption.

Coffee and steam boilers in AISI 316 stainless steel, with **full thermal insulation**, ensure energy efficiency and thermal stability.

SETTINGS
- Automatic: allows up to 6 daily time slots, also remotely manageable
- Manual: enables manual switching of the machine or individual boilers on and off

OPERATING MODES
- Stand-by: low energy consumption state, compliant with ErP Directive (2009/125/EC)
- Eco: keeps the machine at a reduced temperature for fast restart

Coffee and steam circuits can be deactivated independently.

Remote control, in any setting.
Through Wi-Fi connectivity and the *You* **web app**, the machine can be monitored and managed from smartphone or desktop, across multiple installations.

KEY FUNCTIONS
- Remote power on/off
- Boiler temperature adjustment
- Water level monitoring
- Water filter management
- Real-time extraction display
- Coffee and water consumption statistics
- Weekly scheduling

An open **WebSocket API** enables integration with third-party applications.

Barista Kit

Every **YOU** is supplied with an accessory kit that includes:

- Milk jug
- Cleaning brush
- Aluminium tamper
- Sanremo cloth
- Professional portafilters
  (subject to market variation)

YOU Technical Specifications

STANDARD EQUIPMENT

- 4.3” TFT touchscreen display
- Paddle for manual pressure profiling
- 2.5 L removable water tank
- Mains water connection via internal valve
- Advanced 24V electronics with USB for firmware updates, parameter and recipe management
- 24V electrical system for enhanced safety
- Advanced diagnostics for sensors and solenoid valves
- Boiler pressure adjustable from 0.5 to 2.0 bar
- Group head and coffee boiler temperature adjustable from 80 to 98 °C
- Coffee and steam boilers in AISI 316L stainless steel
- Thermal insulation for both boilers
- 24V volumetric pump in AISI 316L stainless steel
- Sanremo SR61 coffee group with PID temperature control
- Programmable mixed water via display
- *Purge* function for group head cleaning after each extraction
- Automatic cleaning cycle
- Programmable timer with up to 6 time slots
- Cold-touch steam wand
- High-efficiency LED work surface lighting
- Wi-Fi module with Android/iOS app, including API/WebSocket connectivity

OPTIONAL

- Customisable side panels
- Bottomless portafilters
- Competition filter
